Abstract

Deals with the general issues and problems concerning relation. It also highlights special problem of referring- a relation between word and what it means; general metaphysical issues of the ontological status of relation have been thrashed out. The relations such as contact, inderence, self-linking, identiy, causalit, objecthood, etc have been discussed discussed the categories like contact and inherence of Nyaya-Vaisesika and also mentioned Bradley's Puzzle of regress and the solutions to his puzzle offered by Bertrand Russell focuses upon the notion of relation in general and signification relation in particular as has been discussed in Tractatus by Wittgenstein. It has been pointed out how the possiblity of saying anything menaningful (i.e. with sense)depends on the actuality of some other things which cannot be said in a logically adequate notation. concentrates of Bhartrhari's concept of relation.
