Abstract

How did the Europeans react to non Europeans in continents other than Europe? How did they reach vis-a-vis other Europeans on a foreign soil ? Which European nation is superior to the others ? It is England, it is France, or is it some other country ? This is what Jules Verne seeks to portray to his readers. After a lot of analysis he comes to the conclusion that no single country is fit to rule the world. It is science which is future ruler of the world.
