CHAPTER 31

MATHEMATICAL SCIENCES
MATHEMATICS

Doctoral Theses

01.   AGGARWAL(Pakhi)
      On 2-Absorbing and 2-Absorbing Primary Submodules of Modules over Commutative Rings.
      Supervisor :Dr. Pratibhi Kumar and Late Dr.Manish Kant Dubey
      Th 23504

                              Contents

      1. Preliminaries 2.2-Absorbing submodules 3.Weakly 2-Absorbing surbmodules 4.2-Absorbing primary submodules 5.Weakly 2-Absorbing primary surbmodules. Bibliography.

02.   ARVIND KUMAR
      Duality in Multiobjectivie Programming Problems under Generalized Convexity.
      Supervisor : Dr. Pankaj Kumar Garg
      Th 23506

                              Contents

      1. Introduction 2. Duality for a second order multiobjective programming problem 3.Symmetric duality for second order multiobjective programming problem 4.Duality for nandifferentiablemultiobjective fractional programming problem. References.

03.   BAWEJA (Meena)
      Multi-Period Protfolio Optimization with Structured Product.
      Supervisor : Prof. V. Ravichandran
      Th23511

                              Contents

      1. Introduction 2.Portfolio optimization with structured products 3.Optimal investment problem with option 4.Portfolio optimization using certain performance ratios 5.Portfolio optimization using conditional sharpe ratio. Conclusions and future research. Bibliography.

04.   BOHRA (Nisha)
      Geometric Properties of Univalent, Bi-univalent and Some Special Functions.
      Supervisor :Prof. V. Ravichandran
      Th23518

                              Contents

      1. Introduction 2. Confluent hypergeometric function and generalized Bessel function 3. Radii problems for normalized Bessel functions of first kind 4. Some

special differential subordinations 5. Bi-univalent analytic functions 6. Schwarzianderivative. References. Index.

05. CHANDER SHEKHAR
Frames for Operators and Operator Branch Frames.
Supervisors :Dr. Shiv Kumar Kaushik
Th23512

Contents

1. Introduction and prerequisites 2. Frames for B (H) 3.O-Frames for operators 4.Operator Branch Frames 5.Perturbation and stability of operator branch frames. References and index.

06. CHAUDHARY (Mamta)
Variational-Like Inequalities in Terms of Bifunctions, Optimality and Duality in Vector Optimization Over Cones.
Supervisor : Dr. Sunila Sharma
Th 23516

Contents

1. Introduction 2.Generalized convexity, generalized monotonicity and veriational-like inequality problems 3.Vector optimization over cones: Optimalityabd duality 4. Set-valued fractional programming problem over cones: Optimality and duality. Bibliography.

07. CHOPRA (Ritika)
Possibilistic, Intuitionistic and Fuzzy Multi-Objective Linear Programming Problems.
Supervisor : Dr. Ratnesh R. Saxena
Th 23499

Contents

1. Introduction 2. Possibilisticlenear programming 3.Fuzzy instuitionistic linear programming problems 4.Fuzzy Multi-objective linear programming problems 5. Future work. Bibliography.

08. DEEPSHIKHA
Weaving Frames in Hilbert Spaces.
Supervisor : Dr. Lalit Kumar
Th 23513

Contents

1. Introduction 2.Infinite weaving frames 3. Weaving frames for operators 4. Weaving continuous frames 5.Weaving generalized continuous frames.References.

09. DEEPTI KAUR
High Accuracy Compact Difference Methods for Multi-Dimensional Fourth Order Quasi-Linear Parabolic Partial Differential Equations.
Supervisor :Dr. Swarn Singh and Prof. R. K. Mohanty
Th 23501

Contents

1. Introduction 2.Highly accurate implicit difference methods for the numerical study of 1D fourth order quasi-linear parabolic partial differential equations 3. Two and three-level implicit high order methods based on off-step discretization for one-dimensional fourth order quasi-linear parabolic partial differential equations 4. High accuracy compact difference methods for two-dimensional fourth order quasi-linear parabolicpartialdifferential equations 5. A class of two-and three-level implicit off-step discretizations of order two in time and four in space for 2D fourth order quasi-linear parabolic partial differential equations 6. Unconditionally stable high accurate compact finite difference approximations for multi-dimensional vibration problems.Scope for future research work.References.

10.   DHINGRA (Mansi)
       Unified Solutions, Stability and Optimality in Set Optimization.
       Supervisor : Prof. C. S. Latitha
       Th23503

Contents

1. Introduction 2.Unified minimal solutions in set iptimization 3.Stability in set optimization 4.Optimality in set-valued optimization.Bibliography.

11.   GARG(Mukta)
       Dynamics of Maps Possessing the Almost Average Shadowing Property and Variants of Transitivity.
       Supervisor : Prof. Ruchi Das
       Th 23519

Contents

1. Introduction2.Almost average shadowing property for discrete dynamical systems 3.Relating the almost average shadowing property with other dynamical properties 4.Almost average shadowing property for continuous semi-flows 5.Exploring some stronger forms of transitivity on G-spaces. References.

12.   GARG(Saakshi)
       Weaving generalized frames in Hilbert spaces and frames in locally convex spaces.
       Supervisors :Dr. Lalit Kumar
       Th 23515

Contents

1. Introduction 2.Weaving generalized frames in hilbert spaces 3.Weaving fusion frames in hilbert spaces 4. Frames in lacally convex spaces 5.Perturbation of frames in locally convex spaces.References.

13.   GOEL(Neha)
       Asymmetric-key Cryptographic Protocols using Different Algebraic Structures.
       Supervisor :Retd. Prof. B. K. Das and Dr. Indivar Gupta
       Th23520

Contents

1. Introduction 2. Key exchange protocols 3. Undeniable signature shcemeover DLCSP 4. Zero knowledge undeniable signature schemes 5. Signcryption. Conclusion. References.

14.　JITENDER KUMAR
Common Fixed Poing Theorems in Complex Valued, Partial and Fuzzy Metric Spaces.
Supervisors :Dr.SachinVashistha
Th 23505

Contents

1.Introduction2. Coupled and common fixed point theorems for generalized contraction3.Common fixed point theorems satisfying contractive conditions of integral type4.Fixed point theorems for weakly compatible and *C*-class functions in partial metric spaces 5.Common fixed point theorems using (CLR$_9$) property in fuzzy metric spaces.References.

15.　KHANNA (Nikhil)
Vanishing Moments of Wavelet Packets and Hilbert Transform of Wavelets.
Supervisor :Dr. Varinder Kumar
Th 23498

Contents

1. Prerequisites 2. Approximations using wavelet packets 3. Approximation using hilberttransform of wavelets 4. Vanishing moments of Hilbert transform of wavelets. 5. Wavelet packets and filters 6. Hilbert transform of convolved (Cross-correlated) signals and moments of two-dimensional wavelets. References. Index.

16.　MITTAL (Richa)
Search of Efficient Rotation Patterns on Successive Occasions and their Applications.
Supervisor :　Dr. KumariPriyanka
Th 23514

Contents

1. Background of preliminaries 2. Searching effective rotation patterns for population median over two successive occasions 3. Exploring rotation patterns for population mean in two occasions successive sampling 4. Rotation patterns addressing non-response on successive occasions 5. Investigation of competent patterns for sensitive characteristics on successive occasions.Referenes.

17.　Ohri (Neelima)
Generalizations of Slant Toeplitz Operators.
Supervisors :　Dr. GopalDatt
Th 23502

Contents

1. Introduction2. Extensions of slant Toeplitz operations 3.Toeplitz type operators on weighted Hardy spaces 4. Slant weighted Toeplitz operators 5. Slant Toeplitz operators on the Lebesgue space of the torus 6. Unanswered problems.References.

18. SHAH (Ashok Kumar)
    Wave Packet Frames in L² ($\mathbb{R}^d$)
    Supervisor :Dr. Raj Kumar
    Th 23507

    Contents

    1.Introduction and preliminaries 2. Linear combinations of wave packet frames in **L**² (R) 3.Perturbation of Irregular weyl- Heisenberg wave packet frames in **L**² ($\mathbb{R}^d$) 4.Stability of wave packet frames in **L**² ($\mathbb{R}^d$) 5.Matrix transform of irregular weyl- Heisenberg wave packet frames in **L**² ($\mathbb{R}$) References.Index.

19. SANTOSH KUMARI
    Weighted Norm Inequalities Involving Integral Operators.
    Supervisor : Dr. Pankaj Jain
    Th 23522

    Contents

    1. Preliminaries 2. Mixed normed inequalities for monotone functions 3.Higher dimensional inequalities over spherical cones 4.Generalised fractional maximal operator 5.Grand Lorentz space and the maximal operator 6.Classes of weights and their properties.List of symbols.References.

20. SHAH JAHAN
    K-**Atomic Decompositions, Atomic Systems and Frames in Branch Spaces.**
    Supervisor : Dr. Varinder Kumar
    Th 23508

    Contents

    1. Introduction and prerequistes 2. *K*-Atomic decompositions in banach spaces 3.Atomic systems for operators in banach spaces 4. Support comes and frames in banachspaces 5. Strong retro banach frames in banach spaces. 6. Cones Associated with frames in banach frames. References.Index.

21. SHARMA (Arti)
    Maximal Graphs Associated to Commutative Rings.
    Supervisor : Dr. Atul Gaur
    Th 23517

    Contents

    1. Introduction 2.Characterization and coloring of maximal graphs 3.Basic properties of maximal graphs 4.Isomorphism of Maximal Graphs 5. Line graphs of maximal graphs 6. Maximal labeling of graphs 7. Energy of maximal graphs.References.

22. SHARMA (Bharti)
    Solution Concepts and Duality for Interval Valued and Dynamic Optimization Problems.
    Supervisor : Dr. Promila Kumar
    Th 23500

    Contents

    1. Introduction 2. Interval valued semi-infinite programming problem 3. Efficiency of higher order for multi-objective variational problems 4. Multi-objective

variational problem with infinite constraints 5. Continuous time non-smooth optimization through quasi efficiency. References.

23.   SHARMA (Uday)
Variants of Multi-Objective Programming Problems in Fuzzy Environment.
Supervisor : Dr. ShashiAggarwal
Th 23510

Contents

1. Introduction 2. Auxiliary tools for fuzzy programming problems 3.Fully fuzzy multi-objective programming problems 4.Fuzzy multi-objective quadratic programming problem. Bibliography.

24.   TYAGI (Ambika)
Bounds for Periodic and Byte Error Locating, Protecting & Correcting Linear Codes.
Supervisor : Prof. V. Ravichandran
Th 23509

Contents

1. Introduction 2. Byte error locating codes 3. Byte protecting codes 4. Periodic error correcting perfect codes 5. Codes correcting low density closed loop burst error. Scope for further research. References

25.   VERMA (Shelly)
Coefficient and Radius Estimates of Normalized Analytic Functions.
Supervisor : Prof. Ahay Kumar and Prof. V. Ravichanderan
Th 23510

Contents

1. Introduction 2. Bound for the fifth coefficient of starlike functions 3. Radius problems associated with janowskistarlike functions 4. Generalized zalcman conjecture for certain classes of analytic functions 5. Inverse coefficient estimates for certain analytic functions. References. Index.
