01. JETHURI (Ankita)
Role of Non-Government Organisations in Enhancing Skills and Employability Among Differently Abled in Delhi.
Supervisor: Prof. Rajesh
Th 26250

Abstract

In the current situation, the term disability has experienced a significant transformation, particularly during the last few decades, thanks to what is commonly referred to as the social model of disability. As a result, in order to address this rising national issue, non-governmental organisations (NGOs) play an active part in providing the essential possibilities for strengthening the young group. Present study analysis the structure, nature, and practices existing in the voluntary sector 's with special reference organizations for differently able Purposive Sampling Method will be used to select the sample for this study. For the study, firstly 10 Non -Governmental organizations were selected. For this, the main selection criterion was evidence of the existence of a range NGOs working exclusively for visually and physically disabled. Non -Government organizations from all the districts of Delhi i.e North, South, East, West and Central will be considered. Further it is extended in South East, South West, North East and North West. It is clear that, training programmes undertaken by the non- Governmental organizations provide skill and employability to the beneficiaries. Contribution of non-Government organizations has significant relation with condition of visually and physically impaired people. The value & contribution of PWDS to their communities should be recognised by society as a whole. Quality educational programmes, a stimulating home environment, adequate health care, and positive support from family, friends, and indeed the community all seem to be significant aspects in allowing PWDS to reach their full potential and live happy lives.

02. PRAMOD KUMAR
From Employment Exchange to University Information Centre : A Study of Guidance and Counselling for Undergraduate Student at Delhi University.
Supervisor: Prof. Rajesh
Th 26251

Abstract

The present study was an attempt to accentuate the needs and aspiration of undergraduate student with the support of UIC (University information centre) taking their career plan in the present global scenario at University of Delhi for enhanced employment opportunities. The expectation and desire of the student has been taken into account for their future course of action for academia in the present university system. The study also tried to look into the present available infrastructure and support system offered by the university through UIC for the academic and occupational needs of the student. In the present global economy the career preference under guidance and counselling is gaining ground with the diversification in learning and education. As it is makes difficult for the youth to take right decision in their desired career choice and employability options in absence of professional guidance. In the Indian prospective the guidance and counselling is getting ground at slow pace as compare to the developed country. The apex body like UGC in its policy direction has asked the higher institution to set up guidance and counselling support system at university level to facilitate the student entering into the higher education to address their academic and psychological needs at college and university level. Guidance and counselling at university level mainly in respect to the career orientation is the need of an hour to address vocational needs and career progression of youth to prepare them for the world of work. It is the felt need of college youth to facilitate with the guidance and counselling support system to make their career aspiration in more planned way. The experience world over shows that the guidance and counselling support in higher education has played a significant role in shaping the life goal of youth. To assess the situation total 700 samples has been taken from the university of Delhi colleges mainly from the north and south university campuses to analyse the current situation. The data has been analysed with the help of SPSS by taking cross tabulation and partial co-relation to conclude the collected data for the study report.
